

CASE STUDY

PRODAR

Underground Mapping

Location: **Hull**
Site: **Concrete Batching Plant**
Survey: **Utility Mapping Survey**
Date: **October 2008**

PRODAR recently completed a utility mapping survey at a concrete batching plant for a Readymix Concrete company in Hull.

In total, the survey area was approximately 3,000m² in size and comprised the main plant yard and adjacent footpaths and highway. Operations were carried out over a two day period, and combined radio-frequency, ground probing radar and digital land surveying techniques.
