

## CASE STUDY

# PRODAR

## Underground Mapping

Location: **Hull**  
Site: **Concrete Batching Plant**  
Survey: **Utility Mapping Survey**  
Date: **October 2008**

PRODAR recently completed a utility mapping survey at a concrete batching plant for a Readymix Concrete company in Hull.

In total, the survey area was approximately 3,000m<sup>2</sup> in size and comprised the main plant yard and adjacent footpaths and highway. Operations were carried out over a two day period, and combined radio-frequency, ground probing radar and digital land surveying techniques.
