

PRODAR

Underground Mapping

CASE STUDY

Location: **Coventry**
Site: **Substation**
Survey: **Utility Mapping Survey**
Date: **November 2008**

Prodar recently completed a utility mapping survey to determine the route of two sets of underground ducts servicing a 132kV substation .

In total the survey area was approximately 3,000m² in size, with operations carried out in a day, Techniques used included a combination of radio-frequency, ground probing radar and traditional land surveying.
