Prodar Surveys Ltd

Unit 20, Carlisle House, Carlisle St, Goole, East Yorks, DN14 5DS

___ the latest detection technology in professional hands
 ___ detect and map underground utilities before you dig
 ___ improve project planning and reduce project downtime
 ___ embark on construction with confidence

An underground mapping survey locates buried utilities and other underground features. The end product is an accurate scale AutoCAD file indicating the routes, depths and positions of the surveyed utilities and features.

Our mapping is carried out using a variety of electromagnetic, visual and ground probing radar techniques.
